

QUARTZ HEATER

Rio

The quartz heater is an advanced heater for users with high demands. The Rio is very effective and has a warm and inviting light. The quartz heater is easy to install and use. The Rio has low operating costs and is silent as well as odourless. Extend the outdoor season by installing the Rio quartz heater under your awning.

Rio can heat a surface of 12m².

Rio quartz heater – black or silver, in 1500W or 2000W.

Rio can be installed horizontally or vertically.

QUARTZ HEATER Rio

FAKTA RIO

Width x Height x Deep:	390 x 100 x 155 mm
Weight:	2,35 kg
Electricity:	230V
Effect:	1,5 & 2,0 kW
Colours:	Silver, Black
Min. mounting height from floor:	2,0 m
Min. distance from roof/cover:	0,3 m
Min. distance from wall:	1,5 m
IP Protection:	IP24 – weather protected
Expected life span of lamp:	Up to 7000 hours

Quartz heater

Rio is IP24 protected for permanent outdoor or indoor usage.

The effective reflector is made of highly treated aluminium.

Function

The quartz heater sends out short wave infrared radiation that only heats people and object, not the surrounding air. Rio gives heat on full effect, directly upon switching it on, resulting in shorter up time and low operating costs.

Installation

Rio can be installed horizontally or vertically on the wall or under the roof.

Benefits

To chose a quartz heater instead of a gas heater or lanterns involves a number of advantages:

- Immediate heat
- Directional heat
- Cost effective heat
- Easy to use and install
- Sound and odor free
- Environmentally friendly
